

Brake Cleaner

This handy and portable cleaner is used to clean vehicle brake parts using an air supply and an aqueous solution to thoroughly clean and dry brake part components in an easy, safe and environmentally friendly way.

Product Description

No need to continue to pay for costly disposal methods because using the PCWS brake cleaner means you can eliminate the use of aerosols which are dangerous for the environment and require a costly disposal method.

The upper 'V' shaped tray has been designed to catch overspray and run off whilst cleaning the brake parts and raises conveniently to the correct working height for safe and easy use.

The PCWS brake cleaner has also been designed with strong, lockable wheels for a totally portable cleaning system that can be used on any workshop surface.

Technical Data

Machine size:
(W) 590mm
(L) 650mm
(H) 1150mm

Machine weight: 30Kgs

Air Operated: 20 -80 Psi

Features

- Height adjustment to suit all needs.
- Air operated machine providing safe operation in hazardous environments.
- Large 'V' shaped drip tray designed to contain all overspray.
